## RESEARCH

He has 39 years of experience in teaching, research and extension in animal agriculture. He is a livestock science specialist, with extensive research and extension experience in following production systems.

- Small Mixed Farming
- Large Mixed Farming
- Commercial Ranching
- Pastoral Production

Lately, his interest has shifted to rabbits, with a firm belief; they are capable of meeting daily protein needs of the poor and landless. Rabbits are best placed to fight the intertwined problems of malnutrition and poverty.

## JOURNALS AND PAPERS PRESENTED

He has published widely on *Maasai* pastoral cattle production, small ruminants including dairy goats and integration of crop and animal agriculture; all in the context of adaptive research and alleviation of poverty. He is credited with authorship of five books and 100 publications in peer reviewed journals, book chapters and proceedings. His pioneer book (1984) on sheep and goat production in the national language is entitled *Ufugaji wa Kondoo na Mbuzi*. His latest publication (2011) is a book entitled, *Maasai men, are they the best in husbandry?*

ISBN: 978-3-659-20323-7.

## Others:

He is the current **Dean of the School of Agricultural and Environmental Sciences at Pwani University**, A farmer in his own right and involved in many community projects.
